ABOUT ME

Third-year Software Engineering undergraduate at the University of Kelaniya seeking a Full Stack Developer internship. Passionate about designing scalable, user-centric web applications using modern technologies. Experienced in full-stack development through real-world projects, applying SOLID principles and CI/CD workflows to write clean, maintainable code.

EDUCATION

B.Sc. (Hons) in Software Engineering

Apr 2024 – Present

University of Kelaniya,

Current GPA: 3.79/4.00

SKILLS

Programming Languages: Java, JavaScript, C, PHP, HTML, CSS

Frontend Development: React.js, Tailwind CSS

Backend Development: Spring Boot, Node.js, Express.js, PHP

Database Technologies: MySQL, MongoDB

Tools & Platforms: Git, GitHub, Postman, Figma, Canva

Core Concepts: OOP, Data Structures & Algorithms, SOLID Principles, CI/CD Pipelines

Soft Skills: Problem Solving, Team Collaboration, Communication, Time Management, Adaptability

PROJECTS

Expense Tracker (Individual Project)

June 2026

- Built an expense tracking application enabling users to log, categorize, and manage personal expenses with secure authentication.
- Set up an automated CI pipeline to streamline testing and deployment.
- Applied professional Git workflows, including branching and structured commits, throughout development.

Tech Stack : React, Node.js, Express.js, MongoDB, GitHub Actions

[Source code](#)

Employee Management System (Individual Project)

April 2026 – May 2026

- Developed a full-stack system to manage employee records, salaries, and administrative tasks with secure, role-based authentication.
- Designed and implemented a MySQL database schema to efficiently store and retrieve employee data.
- Built a responsive React and Tailwind CSS frontend connected to a Spring Boot REST API backend.

Tech Stack : Spring Boot, React, Tailwind CSS, MySQL, Recharts

[Source code](#)

Book Fair Stall Reservation System (Group Project)

Jan 2026 – Feb 2026

- Developed a full-stack web platform for digitised stall reservations, enabling vendors to browse genre-based stalls, book online, and process payments.
- Implemented JWT authentication with role-based access control and a QR-code-based entry verification system sent to vendors via email.
- Built an admin dashboard for real-time stall availability tracking, reservation management, reporting, and refund processing.

Tech Stack : Spring Boot, React, Tailwind CSS, MySQL, ZXing, Thymeleaf, SMTP
