ABOUT ME

Third-year Software Engineering undergraduate at the University of Kelaniya seeking a Full Stack Developer internship. Skilled in building scalable and user-focused web applications using modern frontend and backend technologies. Experienced in developing real-world projects with strong foundations in OOP, SOLID principles, RESTful API design, and clean code practices. Interested in learning emerging technologies, solving complex problems, and collaborating effectively in agile team environments using Git-based workflows.

EDUCATION

B.Sc. (Hons) in Software Engineering

Apr 2024 – Present

University of Kelaniya, Sri Lanka

Current GPA: 3.79/4.00

SKILLS

Programming Languages: Java, JavaScript, C, PHP, HTML, CSS

Frontend Development: React.js, Tailwind CSS

Backend Development: Spring Boot, Node.js, Express.js, PHP

Database Technologies: MySQL, MongoDB

Tools & Platforms: Git, GitHub, GitHub Actions, Postman, Cloudinary, Vercel, Railway, Figma, Canva

Core Concepts: OOP, DSA, SOLID Principles, REST API Design, CI/CD Pipelines, Authentication (JWT, OAuth)

Soft Skills: Problem Solving, Team Collaboration, Communication, Time Management, Adaptability

PROJECTS

SpendWise (Individual Project)

Full-stack expense tracking application featuring secure JWT and Google OAuth authentication, Cloudinary-based image uploads, and Google Gemini 2.5 Flash multimodal AI integration to scan receipt images and extract expense details. Includes interactive expense visualizations built with Recharts and Excel export functionality for offline record-keeping. Set up an automated CI pipeline to streamline testing and deployment.

Tech Stack : MERN Stack, Tailwind CSS, JWT, Google OAuth, Cloudinary, Nodemailer, GitHub Actions

[Source Code](#) | [Live Demo](#)

Student Project Showcase Portal (Group Project)

Developed a full-stack project showcase platform with secure JWT and Google OAuth authentication, role-based dashboards, and an automated approval system for managing student projects. Implemented real-time activity feeds using Server-Sent Events, category and tag-based search, and a fault-tolerant database layer with automatic in-memory failover to ensure uninterrupted service.

Tech Stack : MERN Stack, JWT, Google OAuth, Server-Sent Events (SSE)

[Source Code](#) | [Live Demo](#)

WorkSphere (Individual Project)

Full-stack employee management system with secure, role-based authentication for managing employee records, salaries and administrative tasks. Features a responsive React and Tailwind CSS frontend connected to a Spring Boot REST API backend, backed by a well-structured MySQL database schema designed for efficient storage and retrieval of employee data.

Tech Stack : Spring Boot, React, Tailwind CSS, MySQL, Recharts

[Source Code](#)

Book Fair Stall Reservation System (Group Project)

Full-stack web platform for automating book fair stall reservations, featuring secure JWT authentication with role-based access control, online stall booking with genre-based filtering, and integrated payment processing. Includes QR code based entry verification delivered via email, an admin dashboard for real-time stall availability tracking and reservation management, and reporting and refund processing.

Tech Stack : Spring Boot, React, Tailwind CSS, MySQL, ZXing, Thymeleaf, SMTP
