ABOUT ME

Third-year Software Engineering undergraduate at the University of Kelaniya seeking a Full Stack Developer internship. Skilled in building scalable and user-focused web applications using modern frontend and backend technologies. Experienced in developing real-world projects with strong foundations in OOP, SOLID principles, RESTful API design, and clean code practices. Interested in learning emerging technologies, solving complex problems, and collaborating effectively in agile team environments using Git-based workflows.

EDUCATION

B.Sc. (Hons) in Software Engineering

Apr 2024 – Present

University of Kelaniya,

Current GPA: 3.79/4.00

SKILLS

Programming Languages: Java, JavaScript, C, PHP, HTML, CSS

Frontend Development: React.js, Tailwind CSS

Backend Development: Spring Boot, Node.js, Express.js, PHP

Database Technologies: MySQL, MongoDB

Tools & Platforms: Git, GitHub, GitHub Actions, Postman, Cloudinary, Vercel, Railway, Figma, Canva

Core Concepts: OOP, DSA, SOLID Principles, REST API Design, CI/CD Pipelines, Authentication (JWT, OAuth)

Soft Skills: Problem Solving, Team Collaboration, Communication, Time Management, Adaptability

PROJECTS

Expense Tracker (Individual Project)

Full-stack expense tracking application featuring secure JWT and Google OAuth authentication, Cloudinary-based image uploads, and Google Gemini 2.5 Flash multimodal AI integration to scan receipt images and extract expense details. Includes interactive expense visualizations built with Recharts and Excel export functionality for offline record-keeping.

Tech Stack : MERN Stack, Tailwind CSS, JWT, Google OAuth, Cloudinary, Nodemailer, [Source Code](#) | [Live Demo](#)
GitHub Actions

Employee Management System (Individual Project)

Full-stack employee management system with secure, role-based authentication for managing employee records, salaries, and administrative tasks. Features a responsive React and Tailwind CSS frontend connected to a Spring Boot REST API backend, backed by a well-structured MySQL database schema designed for efficient storage and retrieval of employee data.

Tech Stack : Spring Boot, React, Tailwind CSS, MySQL, Recharts

[Source Code](#)

Book Fair Stall Reservation System (Group Project)

Full-stack web platform for digitised book fair stall reservations, enabling vendors to browse genre-based stalls, book them online, and complete payments securely. Implements JWT authentication with role-based access control and a QR-code-based entry verification system emailed directly to vendors. Also includes an admin dashboard for real-time stall availability tracking, reservation management, reporting, and refund processing.

Tech Stack : Spring Boot, React, Tailwind CSS, MySQL, ZXing, Thymeleaf, SMTP

[Source code](#)

ACHIEVEMENTS & CERTIFICATIONS

Dean's List, University of Kelaniya

Bronze Badge – Java, HackerRank
